WHO WE ARE

MTD is a leading global med-tech group that designs, develops and supplies a full range of medical devices.

We offer a broad spectrum of medical devices and personal care solutions for both patients and healthcare professionals.

Our goal is to continuously improve healthcare, making it safe, simple, accessible and reliable.

PROFESSIONAL PRODUCTS INDEX

- | SYRINGES
- | NEEDLES
- | SCALP-VEIN SETS
- | I.V. CATHETERS
- | SAFETY LANCETS
- | WOUND CARE

SYRINGES - With Needle

APPLICATION

- For therapeutic use through injection
- For sampling of biological material for diagnostic use

FEATURES

- Disposable sterile syringe with needle
- Needle with triple sharpening and anti-coring treatment
- Anti-friction silicone treatment on cannula
- Needle with international colour coding
- Highly transparent polypropylene barrel and white plunger
- Easy to read graduated scale
- Latex free rubber gasket
- Gasket stopper, preventing gasket from coming out of the barrel
- "Peel-Pack" opening
- Latex-free, phthalate-free and pyrogen-free
- Non-toxic

KEY FEATURES

- Indolor™ Experience
- High quality raw materials

RANGE

Syringe Capacity (ml)	Needle Diameter (Gauge)
1 Insulin	G25 G26 G27 G28
1 Tuberculin	G26 G27
2.5 Central Luer	G21 G22 G23
5 Central Luer	G21 G22 G24
10 Central Luer	G20 G21 G22
10 Eccentric Luer	G19 G20 G21
20 Eccentric Luer	G18 G19 G20 G21

SYRINGES - With Needle

APPLICATION

- For therapeutic use through injection
- For sampling of biological material for diagnostic use

RANGE

Syringe Capacity (ml)	Needle Diameter (Gauge)
1 Insulin	G25 G26 G27 G28
1 Tuberculin	G26 G27

10 Eccentric Luer	G19 G20 G21
20 Eccentric Luer	G18 G19 G20 G21

SYRINGES - Without Needle

APPLICATION

- For therapeutic purposes
- For sampling of biological material
- For diagnostic purposes depending on the needle selected

FEATURES

- Disposable sterile syringe
- Highly transparent polypropylene barrel and white plunger
- Easy to read graduated scale
- Latex-free rubber gasket
- Gasket stopper, preventing gasket from coming out of the barrel
- “Peel-Pack” opening
- Latex-free, phthalate-free and pyrogen-free
- Non-toxic

KEY FEATURES

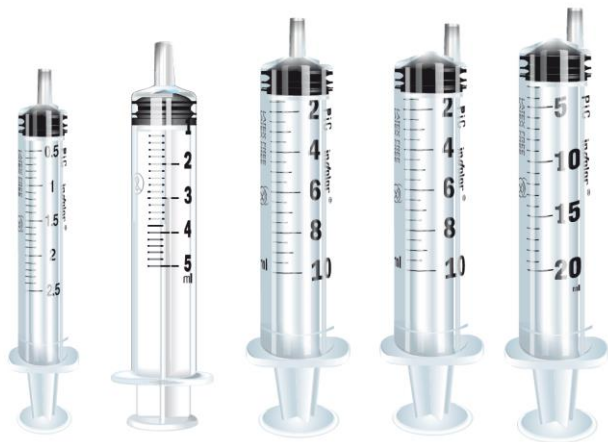

- High quality raw materials

RANGE

Luer Lock	2.5 5 10 20 30 50
Catheter	50 100

*With and without Low Dead Space (LDS)

SYRINGES – Enteral Feeding

APPLICATION

- For administration of fluids food orally or enterally
- For clinical or home care settings by users ranging from clinicians to laypersons (under the supervision of a clinician) in all age groups

FEATURES

- Disposable sterile syringe
- Latex free rubber plunger for a better grip
- High transparent polypropylene
- Easy to read graduated scale
- Fins on the cylinder for a correct ease of use
- End stroke piston stop device
- “Peel-Pack” opening
- Latex-free, phthalate-free and pyrogen-free
- Non-toxic

KEY FEATURES

- High quality raw materials

SYRINGES – EasyClick With Safety Needle

APPLICATION

- For therapeutic use through injection
- For sampling of biological material for diagnostic use

FEATURES

- Safety needle with triple sharpening
- Active safety activation
- Irreversible mechanism
- Click activation
- Anti-friction silicone treatment on cannula
- Needle with international colour coding
- Easy to read graduated scale
- Latex free rubber gasket
- Gasket stopper, prevents gasket from coming out of the barrel
- “Peel-Pack” opening
- Latex-free, phthalate-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- Indolor™ Experience
- Easy activation of safety mechanism: one hand activation without requiring a hard surface

RANGE

Syringe Capacity (ml)	Needle Diameter (Gauge)	Needle Length (mm)
2.5	G22	30
5	G22	30
10	G22	30
10 eccentric	G21	40
20 eccentric	G21	40

NEEDLES – Hypodermic

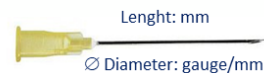

APPLICATION

- For intradermal subcutaneous, intramuscular, intravenous, intra-articular injection therapy
- For sampling of biological material

FEATURES

- Luer Lock hub
- Triple sharpening with anti-coring treatment
- Ultrasound cleaning of the cannula
- Anti-friction silicone treatment
- International colour coding
- Individual “Peel-Open” blister
- Latex-free, phthalate-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- Indolor™ Experience
- High quality raw materials

RANGE

Needle Diameter (Gauge)	Needle Length (mm)
G18	40
G19	25
G19	40
G20	25
G20	40
G21	25
G21	40

NEEDLES – Mesotherapy

APPLICATION

- For subcutaneous injections, especially for mesotherapy treatment and microinjections

FEATURES

- Luer Lock hub
- Triple sharpening with anti-coring treatment
- Ultrasound cleaning of the cannula
- Anti-friction silicone treatment
- International colour coding
- Latex-free, phthalate-free, pyrogen free
- Non-toxic
- Sterile, disposable

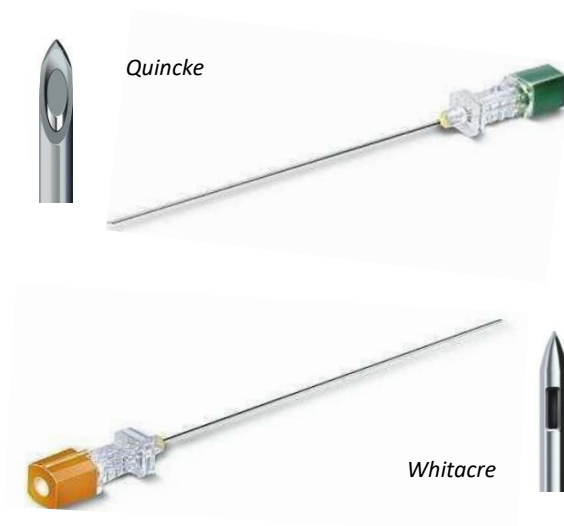

KEY FEATURES

- Good sliding performance after multiple penetration
- High quality raw materials
- Indolor™ Experience

RANGE

Needle Diameter (Gauge)	Needle Length (mm)
G27	4
G27	6

NEEDLES – Spinal

APPLICATION

- For subdural, lower thoracic and lumbar spinal injection

FEATURES

Quincke

- Mainly for cervical and thoracic injections
- Ensures immediate closure of the injection point and reduces loss of spinal fluid
- Quincke needle tip
- Transparent Luer Lock hub
- International colour coding
- Individual “Peel-Open” blister

Whitacre

- Mainly for lumbar injections
- Tip without sharp edges
- Pencil point needle with side hole
- With stylet
- Non-traumatic sharpening
- With introducer (Whitacre type)

KEY FEATURES

- The pencil-shape tip separates spinal cord fibres rather than cutting them
- Large hole very close to the needle tip, so the caregiver can be sure that the correct infusion point has been reached, avoiding post-spinal headache

RANGE

Quincke

G18 G19 G20 G21 G22 G23 G25 G26 G27

Whitacre

Needle Diameter (Gauge)

G22 G24 G25 G27 G29

NEEDLES – Blunt

APPLICATION

- For sterile transfer, mixing and preparing drugs

FEATURES

- Without filter or with a membrane filter of 5 μ m
- Luer Lock hub
- Anti-friction silicone treatment
- International colour coding
- Individual “Peel-Open” blister
- Latex-free, phthalate-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- High quality raw materials

RANGE

Needle Diameter (Gauge)	Needle Length (mm)	Filter
G18	40	No
G18	40	Yes

NEEDLES – EasyClick Hypodermic Safety Needles

APPLICATION

- For intradermal, subcutaneous, intramuscular, intravenous, intra-articular injection therapy
- For sampling of biological material

FEATURES

- Active safety and irreversible mechanism
- Click activation
- Luer Lock hub: compatible with all Luer slip and Luer lock syringes
- International colour code on both the shield and the hub
- No changes required to the standard HCP procedure
- Triple sharpening
- Anti-friction silicone treatment on cannula
- Individual “Peel-Open” blister
- Latex-free, phthalate-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- Indolor™ Experience
- Easy activation: one hand activation without requiring a hard surface

RANGE

Needle Diameter (Gauge)	Needle Length (mm)
G18	40
G20	40
G21	40

G23	30
G25	16
G25	25
G26	13
G27	13

NEEDLES – Protecto SmartSafe

APPLICATION

- For single-use passive safety injection
- For usage in combination with a pre-filled syringe for subcutaneous and intramuscular injection of drugs

FEATURES

- Passive safety mechanism
- Irreversible safety mechanism
- Universal fit: Luer-Slip and Luer-Lock compatible
- Clear colour coding
- Individual “Peel-Open” blister
- Latex-free, phthalate-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- Designed for safety injections
- Triple safe shield protects the needle before, during and after injection, preventing accidental needlestick injuries and eliminating exposure to bloodborne pathogens
- Automatic safety activation mechanism confirms proper device usage, needle protection and lock out (red indicator)

RANGE

Needle Diameter (Gauge)	Needle Length (mm)
G25	25

MADE IN ITALY

NEEDLES – VacuEasyClick SmartSafe

APPLICATION

- Blood collection needle for sampling of biological material for diagnostic use

FEATURES

- Composed by safety needle, luer adapter and holder
- Safety needle protector cap can cover entire cannula after use, preventing needlestick injuries
- International colour coding
- High transparency polypropylene
- Sheathed blunt needle for vacuum tube
- Anti-friction silicone treatment
- Individual “Peel-Open” blister
- Latex-free, phthalate-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- Needle tip with triple sharpening and atraumatic blood draws

RANGE

Needle Diameter (Gauge)	Needle Length (mm)	Colour
G22	25	Black
G22	40	Black
G21	25	Green
G21	40	Green
G20	25	Yellow
G20	40	Yellow

SCALP-VEIN SETS – Mirage & Venogliss

APPLICATION

- Peripheral venous access for therapeutic purposes
- For sampling of biological material for diagnostic purposes

FEATURES

- “Thin wall” scalp vein set
- Needle with triple sharpening and anti-coring treatment
- Ultrasound cleaning of the cannula
- Anti-friction silicone treatment
- Rigid Luer Lock connector
- Individual “Peel-Pack” blister
- International colour coding
- Latex-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- Indolor™ Experience
- High quality raw materials

RANGE

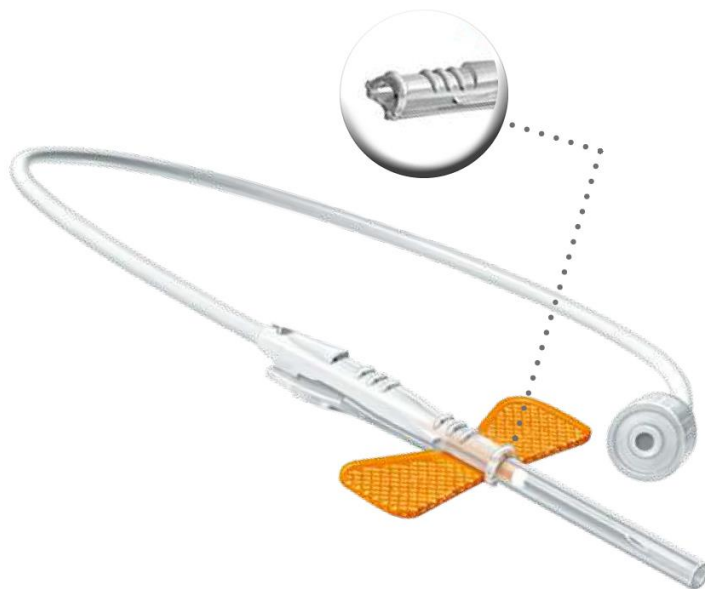

Mirage

Needle Diameter (Gauge)	Needle Length (mm)	Tube Length (mm)
G19 G20 G21 G22 G23 G25	19	300

Venogliss

Needle Diameter (Gauge)	Needle Length (mm)	Tube Length (mm)
G25 G27	19 10	600-900

SCALP-VEIN SETS – Mirage SmartSafe

APPLICATION

- Peripheral venous access for therapeutic purposes
- For sampling of biological material for diagnostic purposes

FEATURES

- Safety system with irreversible mechanism once activated
- Circular housing on the back to constrict the tube, blocking the lumen and preventing the needle from sliding out of the safety shield
- Triple sharpening with anti-coring treatment for painless and easy injections
- Transparent and soft 300 mm tube
- 0.44 ml tube residual volume
- Rigid Luer Lock adapter compatible with other devices
- Individual “Peel-Pack” blister
- Latex-free, phthalate-free, pyrogen free
- Non-toxic
- Sterile, disposable

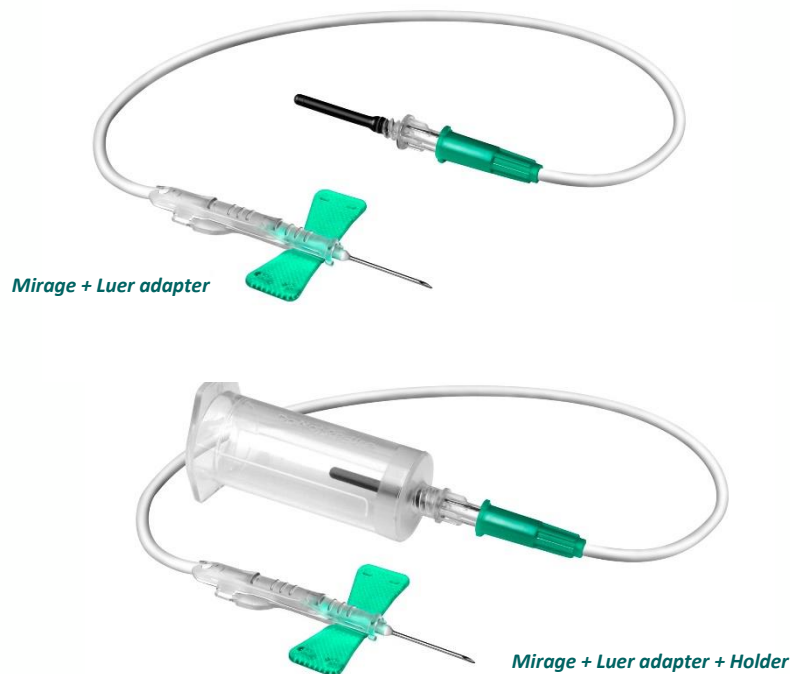

KEY FEATURES

- PiC SmartSafe Technology to minimize the risk of needle-stick injuries
- Active safety system
- Indolor™ Experience
- Non-slip wings for easy insertion

RANGE

Needle Diameter (Gauge)	Needle Length (mm)	Tube Length (cm)
G25	20	30
G23	20	30
G22	20	30
G21	20	30
G19	20	30

SCALP-VEIN SET – VacuMirage SmartSafe

APPLICATION

- Peripheral venous access for diagnostic sampling of biological material
- for multiple blood sample during of one single venous access

FEATURES

- Blood sampling set with safety scalp vein needle, Luer adapter and pre-attached holder (optional)
- Safety system with irreversible mechanism once activated
- Circular housing on the back to constrict the tube, blocking the lumen and preventing the needle from sliding out of the safety shield
- Triple sharpening with anti-coring treatment
- 180-300 mm transparent and soft tube
- Luer adapter made of a 21G needle covered by a latex-free rubber
- Holder made of plastic material useful to guide the insertion of the tube
- International colour coding
- Individual “Peel-Pack” blister
- Latex-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

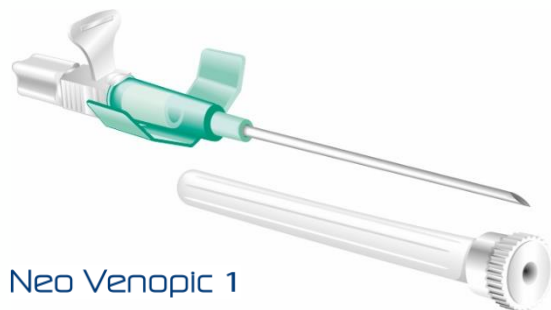

- PiC SmartSafe Technology to minimize the risk of needle-stick injuries
- Active safety system
- Indolor™ Experience
- Non-slip wings for easy insertion

RANGE

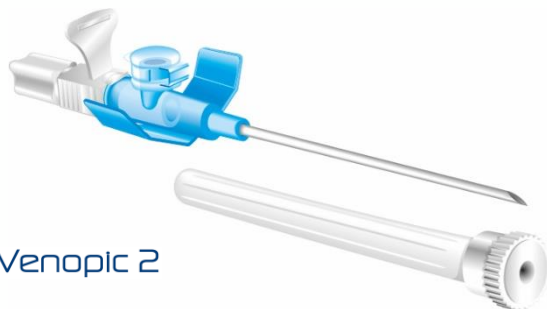

Needle Diameter (Gauge)	Needle Length (mm)	Tube Length (cm)
G25	20	30
G23	20	30
G21	20	30

I.V. CATHETERS – Neo Venopic

Neo Venopic 1

Neo Venopic 2

APPLICATION

- For therapeutic or diagnostic purposes

FEATURES

- “Back Bevel” sharpening
- Radiopaque catheter
- Double conical catheter tapering
- Anti-friction silicone treatment
- Luer Lock hub
- International colour coding
- Individual “Peel-Pack” blister
- Latex-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- Indolor™ Experience

RANGE

- FEP = Fluorinated Ethylene Propylene
- PUR = Polyurethane

I.V. CATHETERS – Venopic SmartSafe

APPLICATION

- For therapeutic or diagnostic purposes

FEATURES

- Protection safety system with irreversible mechanism once activated
- Anti friction silicone treatment
- Double conical catheter tapering
- International colour coded
- Injection port with flip top cap for infusion of occasional boluses
- “Peel-Pack” single blister
- Latex-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- PiC SmartSafe Technology to minimize the risk of needlestick injuries
- Passive safety system
- Indolor™ Experience
- Back bevel sharpening
- Radiopaque catheter

RANGE

- FEP = Fluorinated Ethylene Propylene
- PUR = Polyurethane

I.V. CATHETERS – B-Block Smartsafe

APPLICATION

- For blood sampling or subcutaneous administration of therapeutic fluids and medication in both intermittent and continuous mode

FEATURES

- Needle with passive safety against accidental injuries
- Soft butterfly with knurled wings for safe fastening to the patient's skin and adequate breathability
- "Back Bevel" atraumatic sharpening
- Polyurethane (PUR) catheter tube with 3 radiopaque strips (Rx)
- Double conical catheter tapering
- Anti-friction silicone treatment
- Transparent flash-back chamber to check blood flow immediately confirming insertion in the vein
- Polyurethane extension tube, kink-resistant, prevents blood leakage during cannula insertion
- Suitable for subcutaneous administrations
- Latex-free, PVC-free, pyrogen free
- Non-toxic
- Sterile, disposable

KEY FEATURES

- PiC SmartSafe Technology to minimize the risk of needle-stick injuries
- Needle with passive safety against accidental injuries
- Double safety to avoid any form of blood contact and minimizes needle-stick injuries, all-in-one device
- Easy to handle fully covered safety device, protects the operator from accidental needle-stick injury

SAFETY LANCETS – Acti-Lance®

APPLICATION

Acti-Lance® safety lancets are sterile, single-use medical devices intended for capillary blood sampling

Intended users are healthcare professionals and lay users

FEATURES

- Comfortable finger surface for push-button activation
- T-shape for firm and intuitive grip
- Wide lancet tip enables precise and convenient positioning on the test site
- Fully enclosed needle housing to prevent sharps injuries
- Long protective cap for easy removal
- Protective cap ensures needle safety

KEY FEATURES

Push-button activated safety lancet with a T-shape design for intuitive grip, available in the three most popular sizes. Clinically proven, safe and effective lancing process produces adequate blood volume for test requirements and minimizes the pain perceived by patients during and after lancing

Product version	Needle Gauge/blade	Penetration depth (mm)
Acti-Lance® Lite	28G	1.5
Acti-Lance® Universal	23G	1.8
Acti-Lance® Special	17 blade	2

MADE IN POLAND

SAFETY LANCETS – ergoLance®

APPLICATION

ergoLance® safety lancets are sterile, single-use medical devices intended for capillary blood sampling

Intended users are healthcare professionals and lay users

FEATURES

- No release button. Gentle pressure activation
- Ergonomic concave housing with comfortable finger recess
- Special lancet shape distracts attention from the stick
- Precise placement on the test site is guaranteed by the clear visual guide: the arrow indicates the movement of the device towards the puncture site
- Ribbed protective cap guarantees needle sterility and provides a secure grip for easy twist-off removal
- Good Design 2016 finalist

KEY FEATURES

Contact activated safety lancet with distinctive, ergonomic design available in the three most popular sizes, considered one of most efficient and reliable products in terms of blood volume and minimized pain perception during and after lancing

Product version	Needle	Penetration
	Gauge / blade	Depth (mm)
ergoLance® Micro Flow	30G	1.5
ergoLance® Normal Flow	25G	1.8
ergoLance® High Flow	21G	2

MADE IN POLAND

SAFETY LANCETS – Haemolance Plus®

MADE IN POLAND

APPLICATION

Haemolance Plus® safety lancets are sterile, single-use medical devices intended for capillary blood sampling

Intended users are healthcare professionals

FEATURES

- High quality appearance
- Comfortable finger recess for push-button activation
- Ergonomic shape with extra ribs for a firm, non-slip grip
- Guide marks denote sample point for adequate placement on the test site
- Protective cap guarantees needle sterility
- Ribbed protective cap offers a secure grip
- 6 different sizes, including needle and blade versions, deliver adequate blood volumes and cover a wide range of rapid blood tests

KEY FEATURES

Push-button activated safety lancet made from premium materials with handy rounded shape presented in 6 sizes, including needle and blade versions, delivers blood volumes covering a wide range of rapid blood tests (from 20 µl to 180 µl) and evaluated in a clinical study as the least painful safety lancet after 30 minutes from lancing, contributing to the comfort of the patient and user

Product version	Needle Gauge/blade	Penetration Depth (mm)
Haemolance Plus® Micro Flow	28G	1.6
Haemolance Plus® Low Flow	25G	1.4
Haemolance Plus® Normal flow	21G	1.8
Haemolance Plus® High Flow	18G	1.8
Haemolance Plus® Max Flow	1.5 mm blade	1.6
Haemolance Plus® Paediatric	1.5 mm blade	1.2

SAFETY LANCETS – Medisafe® Solo

Professional Products
Catalogue

MTD | 26

MADE IN POLAND

APPLICATION

MediSafe Solo® safety lancets are sterile, single-use medical devices intended for capillary blood sampling

Intended users are healthcare professionals

FEATURES

- Flat push-button activation with extra ribs for comfortable finger placement
- Ergonomic shape with extra side wings for a firm grip
- Long protective cap guarantees needle sterility and gives a secure grip for easy twist off removal
- Light product design and needle geometry ensures a suitable blood sample
- Audible lancing confirmation

KEY FEATURES

Push-button activated safety lancet. Uncluttered, three-component design preserves safety and functionality for capillary blood sampling. Clinically proven to provide sufficient blood volume for testing while minimising the pain perceived by the patient

RANGE

Product version	Needle Gauge / blade	Penetration Depth (mm)
MediSafe® Solo	29G	1.5
MediSafe® Solo	28G	1.5
MediSafe® Solo	23G	2.0

SAFETY LANCETS – Medlance® Plus

APPLICATION

Medlance® Plus safety lancets are sterile, single-use medical devices intended for capillary blood sampling. Intended users are healthcare professionals

FEATURES

- Contact activation, no pre-loading required
- A variety of versions to meet the needs of all patients and healthcare professionals with clear colour coding by product size
- Two-step operation means minimal training is required for healthcare professionals and blood tests are performed rapidly
- Needle retraction mechanism designed to prevent accidental punctures before and after use
- Size easy to handle

KEY FEATURES

Contact activated safety lancet with closed, compact body design available in a wide range of sizes including the thinnest needle (30G). Clinically proven safety and efficacy for easy and comfortable capillary blood sampling

RANGE

Product version	Needle	
	Gauge/blade	Penetration Depth (mm)
Medlance® Plus Super Lite	28G	1.2
Medlance® Plus Lite	23G	1.5
Medlance® Plus Universal	21G	1.8
Medlance® Plus Extra	21G	2.4
Medlance® Plus Special	0.8 mm blade	2.0

MADE IN POLAND

SAFETY LANCETS – Safe Digitest™

MADE IN POLAND

APPLICATION

Contact activated safety lancets for obtaining micro samples of capillary blood from finger pricks

FEATURES

SAFETY

- The reliability and high quality of the product may help to reduce the risk of cross-contamination
- Helps to prevent accidental punctures before and after use

CLOSED, COMPACT BODY

- Closed, compact body design and optimal lancet size for easy handling
- Long safety cap ensures a firm grip and fast and easy cap removal
- Two-step operation means minimal training is required and blood test is performed rapidly

WIDE RANGE

- Large variety of versions to meet all patient and healthcare professional needs
- Clear colour coding for correct product size distinction
- Friendly colours distract attention from the needle stick

KEY FEATURES

Contact activated safety lancet with closed, compact body design available in a wide range of sizes including the thinnest needle (30G). Clinically proven safety and efficacy for easy and comfortable capillary blood sampling

RANGE

Needle Gauge (G)	Penetration Depth (mm)
30G	1.2 mm
25G	1.5 mm
21G	1.8 mm
21G	2.4 mm

SAFETY LANCETS – Safe Digitest™ Plus

APPLICATION

Push-button activated safety lancets for fingertip capillary blood sampling

FEATURES

SAFETY

- Fully enclosed needle housing to prevent sharps injuries
- Long and contoured protective cap for easy removal and needle sterility

COMFORT

- Comfortable finger surface for push-button activation
- T-shape for firm and intuitive grip
- Wide lancet tip enables precise and convenient positioning on the test site

KEY FEATURES

Push-button activated safety lancet with a T-shape design for intuitive grip, available in most popular sizes. Clinically proven, safe and effective lancing process produces adequate blood volume for test requirements and minimizes the pain perceived by patients during and after lancing

RANGE

Needle Gauge (G)	Penetration Depth (mm)
23G	1.8 mm
28G	1.5 mm

MADE IN POLAND

APPLICATION

Gentle plaster with antibacterial pad, for protecting large surgical wounds

FEATURES

- Ideal for covering and protecting large surgical wounds
- Breathable
- Highly absorbent pad
- Recommended for delicate skin and frequent changes

KEY FEATURES

- Doesn't cling to the wound
- Breathable
- Highly absorbent pad

RANGE

Size	Pcs/unit

POST OPERATIVE PLASTERS – Aquabloc

Professional Products
Catalogue

MTD | 31

APPLICATION

Thin, transparent waterproof dressing with antibacterial pad for surgical or large wounds. Swimming or showering are no longer a problem

FEATURES

- Long-lasting barrier against water
- Very thin and transparent
- Large wounds and surgical wounds
- Recommended for normal skin

KEY FEATURES

- Antibacterial effect: with Chlorhexidine Digluconate
- Doesn't cling to the wound
- Easy to open pack
- Invisible effect

RANGE

Size	Pcs/unit
cm 5 x 7	5 plasters
10 x 6 cm	5 plasters

MADE IN ITALY

APPLICATION

Professional non-woven sterile adhesive strips, used to assist the healing of medium-depth (around 5 mm deep) cuts or injuries. An alternative to surgical stitches or staples

FEATURES

- Hypoallergenic
- Latex Free
- Made with a special reinforced weave that provides necessary tension and support to keep both sides of the wound together
- An alternative to surgical stitches

KEY FEATURES

- Keeps the edges of the wound firmly together
- Tear off to desired size
- Different size according to wound size

RANGE

Size	Pcs/unit
3 x 75 mm	10
6 x 75 mm	6
6 x 100 mm	10
12 x 100 mm	6

PLASTER ON SPOOL – Soffix Tela

APPLICATION

A fabric tape spool recommended for securing primary dressing (gauze, bandages) on normal skin when frequent changes are not required

FEATURES

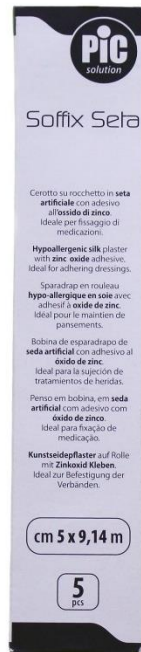

- Made of fabric
- Recommended for normal skin
- Ideal for the whole family

KEY FEATURES

- High adhesion, which increases progressively with time
- Available in white or skin colour

RANGE

Available in different sizes

APPLICATION

Silk adhesive spool plaster, suitable for securing primary dressing (gauze, bandages) for long term application on sensitive and delicate skin

FEATURES

- Silk fabric
- Gentle on the skin
- Ideal for the whole family

KEY FEATURES

- Breathable
- Soft
- Easy to use
- Can be cut without scissors
- Easy to apply thanks to the spooling indicator

RANGE

Available in different sizes

PLASTER ON SPOOL – Soffix Transparent

Professional Products
Catalogue

MTD | 35

APPLICATION

Ideal for securing probes, tubes and catheters

FEATURES

- Very elastic
- Specifically designed for securing probes, tubes and catheters
- Also ideal for sensitive skin

KEY FEATURES

- Breathable
- Gentle on the skin
- Can be cut without scissors
